

Nextbase NBDVR312GW Upgrade Instructions

<p>1. Download the latest version of the NEXTBASE NBDVR312GW Firmware from the Downloads Section of the NEXTBASE Website.</p>	
<p>2. The Firmware Update will download as a ZIP file. This will need to be opened and the Firmware Update Files (FW312GWB.bin and FW96655A.bin) extracted.</p>	
<p>3. Copy the Firmware Update Files (FW96655A.bin and FW312GWB.bin) onto a blank, formatted MicroSD card.</p>	
<p>4. Insert MicroSD card into camera when camera is powered off and disconnected</p>	
<p>5. Reconnect car power cable to camera</p>	
<p>6. The LED in the bottom left corner of the camera will begin to flash while the update is installing but the screen will remain blank</p>	
<p>7. When the update has completed the camera will restart and begin recording</p>	
<p>8. To check that the update has completed successfully select System Info from the camera Setup Menu</p>	
<p>9. Select Version from the System Info screen and the camera will display its current Firmware Version</p>	
<p>10. Lastly, format the MicroSD card using the option in the camera Setup Menu so that the camera does not try to install the update again whenever the power cable is connected</p>
