

Nextbase NBDVR312G Upgrade Instructions

<p>1. Download the latest version of the NEXTBASE NBDVR312G Firmware from the Downloads Section of the NEXTBASE Website.</p>	
<p>2. The Firmware Update will download as a single file labelled FW312GB.bin</p>	
<p>3. Copy the Firmware Update File onto a blank, formatted MicroSD card. Please note, the file name must not be changed or it will not be detected by your dash cam.</p>	
<p>4. With power turned off, insert the MicroSD Card containing the Firmware Update File into the slot in the side of the dash cam.</p>	
<p>5. Connect the power cable to the USB connection on the side of the mount.</p>	
<p>6. The dash cam will power on and begin installing the Firmware update</p>	
<p>7. Once the Firmware update has been installed the dash cam will restart and display the First Time Use Setup Menu. Use the Arrow Buttons to choose your required settings and the OK button to Confirm</p>	
<p>8. To check the update has been successful, Press the Menu Button twice to display the Setup Menu.</p>	

9. Press the down arrow to scroll down to the third Setup Menu screen and then highlight System Info, then press the OK button to select

10. The second line of System Info – Page 1 will show the Firmware Version Number
